Numbers up at JCC

Enrollment rises for the second consecutive year

by JUSTIN R. LESSMAN Publisher

Student numbers at Jackson County Central Schools are up this fall for the second consecutive year.

Official fall enrollment figures reported to the Minnesota Department of Education earlier this month show 1,129 kindergarten through 12thgrade students enrolled in JCC schools. That's seven more than last year and comes on the heels of a dozen-student increase the year prior. Before last year's increase, the district had suffered through four straight years of declining enrollment.

Though less than what preliminary enrollment figures seemed to indicate just ahead of school starting in September, the official Oct. 1 student count is still higher than it was last year — and that makes school administrators hap-

py. "I'm excited because the high school numbers are up," said JCC High School Principal Larry Traetow.

Ditto for JCC Middle School Principal Chris Naumann.

"We're up a little bit." he said. "Good things are happening at the middle school."

Tammy Timko, principal of Pleasantview Elementary School in Lakefield, agreed.

"It's good to see the numbers increasing," she said. The largest grade at JCC

Expert appraiser Mark Moran gets a closer look at the hand-painted detail on Cindy Albrecht's ceramic dresser box during an antique appraisal event at the Jackson library last week.

ANTIQUES ROADSHOW

Despite what is stated on a certificate of appraisal attached the back of the frame, expert appraiser Mark Moran informs Rachel Landherr her piece of artwork is not worth \$162,700, but rather about \$60.

Expert appraiser takes a peek at local treasures

by JUSTIN R. LESSMAN Publisher

The people of Jackson County opened their treasure chests last week to have their most precious items evaluated by a traveling "Antiques Roadshow" appraiser.

Over the course of three hours last Wednesday at the Jackson library, expert appraiser Mark Moran inspected dozens of antiques

and heirlooms, explaining their origin and value while learning a bit about their rich local history in the process.

Some items brought before Moran were purchased for pennies; others have been passed down through the generations. All received Moran's expert — and oftentimes entertaining — evaluation.

Grant dollars are enhancing art education at Pleasantivew Elementary School.

Art instructor Aline Wilking has applied for and received more than \$5,800 in grants from the Robert and Helen Remick Charitable Foundation Trust and the Jackson County Central Education Foundation over the last year. That money has been used to purchase new art studio equipment and hardware at the school. Wilking, who is her See GRANT on A7

Winter snowstorms and a wet spring have played a big part in the decrease in pheasants in the area, according to the 2019 Minnesota August Roadside Survey published by the Minnesota Department of Natural Resources.

That means fewer birds and what the DNR labels "poor" pheasant hunting prospects for all of Jackson County.

The range-wide pheasant index decreased 17 percent from a year ago and that number is even more dramatic in the southwest part of the state, where the pheasant count is down 32 percent from 2018 and a whopping 46 percent from the 10-year average.

That's in large part to the weather, according to the DNR's annual report.

spring rains and resulting flooding throughout much of the core pheasant range likely impacted nesting activity during the 2019 breeding season," the report states.

What it boils down to is an indicated "poor" hunting season in Jackson County.

The entire county falls under that distinction according to the August Roadside count, meaning between 10-24 pheasants were spotted per square mile. The only spot in the southwest region receiv-ing a "good" outlook is the northern edge of Lyon

county, but several areas - including almost all of Pipestone County — fall in the "fair category."

The wet spring also meant crops were put in late and many are still in the fields, giving pheasants plenty of places to seek shelter from hunters as the season opens Saturday.

"I look for the weekend to be busy, but I also look for it to be a challenge,' said DNR conservation officer Mike Gruhlke. "I say that because much of the crop is still in the ground. That's always a factor in
