Letters to the Editor

Editor's Note: Sending your letter to us by email speeds up our production work because we spend less time typesetting. Whenever possible, please send letters to the editor by email to editor@thedrummer.com or ads@thedrummer.com, attention Tom or Emily. Please include address and daytime phone number. Thank you.)

To The Editor

During 2020-2021 there have been two global spike protein bioweapons attacks. Twenty years of US patents to the NIH, drug companies, educational institutions and other entities outline the far-from-novel Sars-Cov spike protein development, starting before the original outbreak in 2003. (See Dr. David Martin and Reiner Fuellmich <https://www.bitchute.com/video/v91cFa1NVyvg/>) It is a genetically engineered, transmissible pathogen orchestrated by Fauci and his gain-of-function cohorts, the second bioweapon being the gene manipulation inoculations.

From the beginning of the current outbreak government and media have been spreading misinformation about tests, masks, social distancing, effective early treatments, nutritional factors, hospitalizations, deaths, natural immunity, risk of dying, safety, and efficacy of shots. Many citizens continue to trust the narrative, in spite of frequent scientific proof from heroic doctors and top scientists that the injections are neither safe

nor effective and may actually be designed to trigger death, depopulation and transhumanism.

Government-funded psychological operations have filled the public with excessive and unrealistic fears of COVID infection such that alcohol use increased more than 400% and opioid overdoses and suicides skyrocketed during the lockdowns.

However, the excess deaths from all causes began rising not during the lockdowns, but as the shots were given, and one analysis of American deaths finds totals that are 14-16% beyond expected mortality (looking at the previous 5 years) for the period from January-August 2021. <https://www.lewrockwell.com/2021/10/joseph-mercola-are-the-covid-jabs-responsible-for-rising-mortality-trends/>

Is there any number of fatalities and adverse effects that might stop the shots? Will citizens recognize that exchanging their natural immunity for a gene-modifying shot every 6 months is sure to lead to compromised health? Many citizens are resisting the illegal mandates, bearing whatever consequences to preserve their health.

The "boosters" are not reduced shots, but full doses of the original spike and have been found to also contain parasites and metallic objects as well as toxic spike protein RNA that will replicate throughout the body indefinitely. Tested flu shot vials

showed similar toxic ingredients.

Who is waging this bioweapon warfare, exerting control in world governments and big businesses? Sources and names that surface are World Economic Forum, WHO, UN, eugenic drug companies, Bill Gates, Anthony Fauci, China. Many are transparent in their goal to reduce the world's population by 7 billion.

These psychopaths are the enemy. Their goal is to keep people fighting one another—the person of another color, the illegal immigrants, those of a different political party or religion—to distract from what is being done globally. The unvaxxed, many who have lasting natural immunity through recovery (or just a strong and young well-fed immune system), are special targets. Children are unscientifically portrayed as a Covid danger to adults, but they must be protected from shots they don't need that will destroy their natural immune systems.

Four thousand patents as well as official UN, WEF, and other documents show that this evil has been developed without public scrutiny by those eager to develop pathogens, then tests to detect them, then "immunizations" to "protect" the public from the pathogens they designed in the pursuit of power, profit, and depopulation.

Evil exists, yet a good, lov-

ing, and powerful God also exists. There is no better time to start searching for truth of the dichotomy. God's people are called upon to believe in Jesus's saving power for eternity and to share that good news and to love and support those in need. God's Word is clear - in the final battle Christ prevails, not Satan and his followers.

Lesley Walz, Buffalo

Emily's Voice

By Emily Wirtz

Gabby Petito Case: Look out for those around you

The story of Gabby Petito and Brian Laundrie has been taking the nation by storm, and speculations and opinions have been shared all over social media. Some believe that the Laundrie parents have some involvement in this case. Some believe that the remains found did not truly belong to Brian Laundrie. This is an ongoing investigation and there seems to be more information every day.

So how can we make a difference here in Wright County? Thousands of miles away from where any of this occurred. Can we prevent something like this from happening in our hometown? Can we learn from this case and do better as a society?

A topic that has been discussed a lot since more information has come out about this case is domestic abuse. There have been many posts on social media shared about young women's self-defense and safety tips, posts that people who are being abused just need to leave their abuser, and signs that someone is abusive and more. Often, a lot of this is geared towards topics to teach your daughter.

One thing you don't see very often is information on how to teach your children how to treat others, specifically in a relationship. For example, you often don't see posts on social media about teaching young men that hitting or abuse isn't okay. Domestic abuse cases are frequently used as a learning experience for females since females are more likely to get abused.

It's important that we look at these issues from both sides. It is not just on the victims to get themselves out of that situation. It isn't always easy or safe for victims to just leave. It's also not someone's fault that they became a victim of domestic abuse. It's so

important that we teach the younger generations how to control their anger in a healthy way, and that physical abuse or mental abuse is not how you treat a partner; or anyone.

We do not know the full details of the abuse that was going on in Petito and Laundrie's relationship. All we know is from the body cam footage from when they got pulled over in Utah, after Petito and Laundrie got into a physical altercation in public. That could have been the only instance, or one of many.

Another huge take away from this case, is if you see abuse or even possible abuse, always report it. If someone goes missing, report it as soon as possible. Share missing persons posts on social media. You could potentially save someone's life. It's better to be safe than sorry.

According to Kare 11 News, last year 30 individuals lost their lives to intimate partner homicide in Minnesota alone. As we saw in the Utah body cam footage of Petito and Laundrie, law enforcement officers had received a call earlier that there was a domestic dispute between the two. Law enforcement ended up separating the couple for the night.

It's also important to remember that this is not meant to be entertainment. Two young lives were lost in this case. Two families are grieving, friends of both individuals are grieving. It is a tremendously tragic occurrence. Those close to Petito and Laundrie have been dealing with the aftermath of this for a few months now. Showing respect and praying for those involved is just one way to make a positive impact on a currently very dark situation.

If you or someone you know is the victim of domestic abuse call: (866) 223-1111.

HEADLINE IN AREA NEWSPAPERS

HOPPING

Letters to the Editor

We encourage letters to the editor about public matters. Please state your views briefly in your own words. Letters must be signed by the writer and include the legible name, address and daytime phone number of the writer. Only your name and town will normally be published. All letters are subject to editing for clarity, space and appropriateness of content. We reserve the right to refuse publication of any letter. Address letter as follows: Letters to editor, Wright County Journal-Press, P.O. Box 159, Buffalo, MN 55313.

During political election campaigns, we prefer to reserve space in the letters column primarily for our readers and not necessarily for the candidates or campaign committees. We ask that candidates and people who are active on their committees, please identify themselves when submitting material during a campaign. We will consider publishing that material elsewhere on the Opinion Pages. This is not a perfect system. Sometimes candidates feel entitled to respond within the letters column to what they see as serious false charges or significant factual errors made against them in someone's earlier letter. This newspaper tries to be fair in those cases. Do not wait until election eve to raise a serious new issue, when insufficient time remains for a reply.

Advertising Policy Notice to Advertisers

Policy on Errors - Normal and reasonable care is taken to avoid errors or omissions during preparation and printing of the Wright County Journal-Press and The Drummer. Other than this care, NO guarantee of accuracy or performance is made. The best insurance against errors or omissions is for the advertiser to request a PROOF copy of the advertisement, which the advertiser can carefully check before publication. If special circumstances place greater than normal importance on a particular advertisement, the advertiser MUST call this fact to the personal attention of the publisher. The advertiser MUST personally read and approve a PROOF copy of that particularly important advertisement before the press run begins.

First Publication is Proof - The first publication of an advertisement shall be considered a PROOF copy to the advertiser, in all cases where that advertisement is ordered to run more than once. If an error is found in the first publication, the advertiser MUST notify the publisher at once, so that a correction can be made before any additional publications take place. The publisher is not responsible for the additional charges due as a result of any subsequent publications of an advertisement which contained an error in the first publication.

Cancellation or Rejection of Ads - The publisher reserves the right to cancel or reject any advertisement at any time.
Errors & Omissions - The publisher's liability on account of any error affecting any advertisement shall not exceed the amount of the price normally charged to the advertiser for that specific advertisement. The publisher's liability on account of the omission of an advertisement, properly accepted for publication, shall be limited to a refund of any money paid toward the cost of publishing that advertisement. If that advertisement was scheduled to run more than once, the publisher's liability shall be limited to a refund of any money paid toward the cost of the original plus any additional publications.

Errors in Prices - A price quoted in an advertisement is often considered an invitation to deal and not a guarantee to sell. If an incorrect price appears in your advertisement because of a printer's error, please contact the publisher immediately. The newspaper will provide a letter or affidavit acknowledging the printer's error. Display the letter in your store and refuse to sell at the incorrectly advertised price or terms. Advertisers who choose to continue selling at the incorrectly advertised price or terms, do so at their own expense and the publisher assumes no responsibility to reimburse for such losses.

Errors in Copy - The advertiser agrees to indemnify and hold the publisher harmless in any litigation or claim arising out of advertising copy or content supplied to the publisher by the advertiser or his agency or agents.

Subscriptions: \$44.50 year MN; \$55.00 year USA

A 10 percent Senior Citizen discount, off regular rates, for ages 62 and over, if proof of age is presented.
